

**Question:**  $x[n]$  is convolved with  $h[n]$  to give  $y[n]$ . If  $y[2] = 1$  and  $y[3] = 0$  then find  $h[0]$ . (Graphs are not uniformly scaled) [GATE BM 2021]

$x[n]$  is convolved with  $h[n]$  to give  $y[n]$ . If  $y[2] = 1$  and  $y[3] = 0$ ,  $h[0] = \underline{\hspace{2cm}}$ . (Graphs are not uniformly scaled)

**Solution:**

Parameter	Value	Description
$x(1)$	0.1	$x(n)$
$x(2)$	0.5	$x(n)$
$x(3)$	0.4	$x(n)$
$h(2)$	0	$h(n)$
$h(3)$	0	$h(n)$
$y(2)$	1	$y(n)$
$y(3)$	0	$y(n)$

TABLE I  
INPUT VALUES

By convolution we know that,

$$y(n) = (x * h)(n) = \sum_{k=-\infty}^{\infty} x(k) \cdot h(n-k) \quad (1)$$

$$\Rightarrow y(2) = 0.5h(0) + 0.1h(1) \quad (2)$$

$$\Rightarrow y(3) = 0.4h(0) + 0.5h(1) \quad (3)$$

From the values in Table I:

$$y(2) = 0.5h(0) + 0.1h(1) = 1 \quad (4)$$

$$y(3) = 0.4h(0) + 0.5h(1) = 0 \quad (5)$$

By solving equations (4) and (5) we get,

$$5 = 2.1h(0) \quad (6)$$

$$\Rightarrow h(0) = \frac{5}{2.1} \quad (7)$$

$$\therefore h(0) = 2.38 \quad (8)$$
